

NASA GODDARD OPTIMUS PRIME SPINOFF CHALLENGE

NIA Universe

The InWorld Challenge is within NIA Universe—a multi-user virtual world where teams showcase their spinoff design solutions as 3D models and knowledge spaces. Powered by Activeworlds, only registered InWorld Challenge participants may build and communicate within NIA Universe. Tourists may be invited InWorld to view design solutions, but may not interact or build within this space.

Registered participants will receive invitations to join us InWorld for Question and Answer sessions throughout both challenges.
